Agenda → Why do we need React

Introduction to React

* What is React & it's advantages → 2014/2013
* Setting up react using CDN links
* components
* JSX → template string
* props
* component composition
* Rendering Lists
  * key prop
* ways to add styling in react

Note → every browser only understand → HTML, CSS, JS

→ WASM

→ browser API.

Challenges → Frontend

(*) Single Page App

Solution → history API

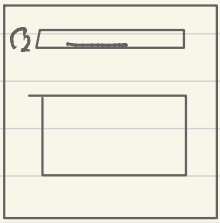
single page application

lot of features
↳ UI
↳ large code base
↳ ship large amount of code → frontend
↳ manage that code

(*) lot of UI features → in a webpage
↳ moving parts in a small section of UI
↳ frequent dom update → costly

(*) Manage the code efficiently
↳ modularization
↳ management
↳ sending large amount of data
↳ webpack, parcel
↳ module bundler

fetch, history



vite

CRA

→ algorithm

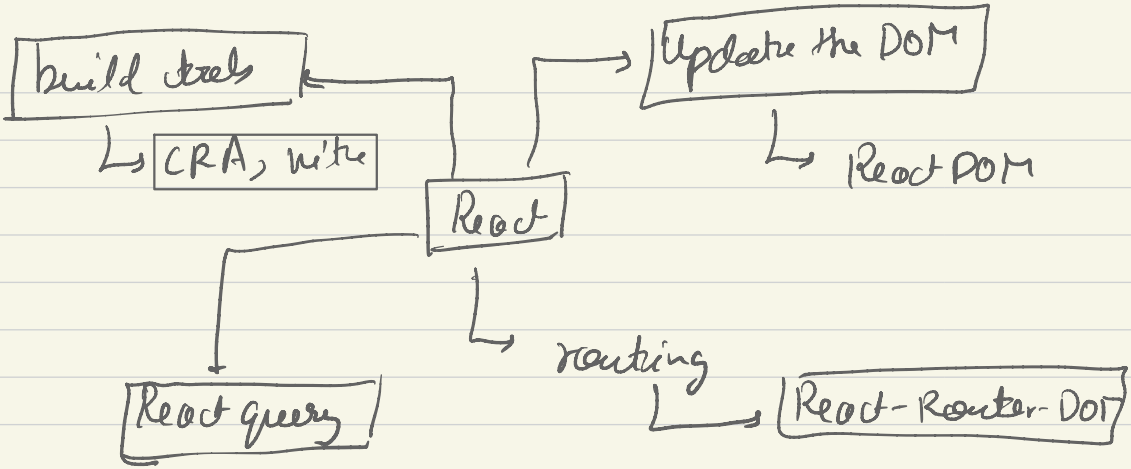
React → indentify how to efficiently update the UI

Desktop → Electron

Mobile → React Native

Web → React DOM

VR → React VR



build tools
CRA, vite
Update the DOM
React DOM
React
routing
React query
React-Router-DOM
