
Class will start

at 7:05 AM

Agenda

Machine coding Problem : Infinite scroll / lazing loading

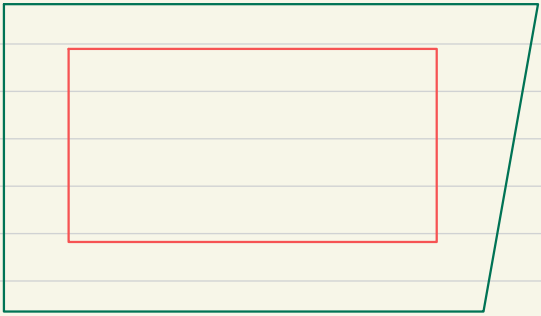
* Practice our knowledge of useEffect
* Intersection Observer API
* Custom Hook, css modules

* Routing → React Router DOM
  * Client side routing
  * setup of react router dom
  * Links, Routes, Redirects, Browser Router
  * Template Routes, 404 Page not found,

nested Routes

Frontend

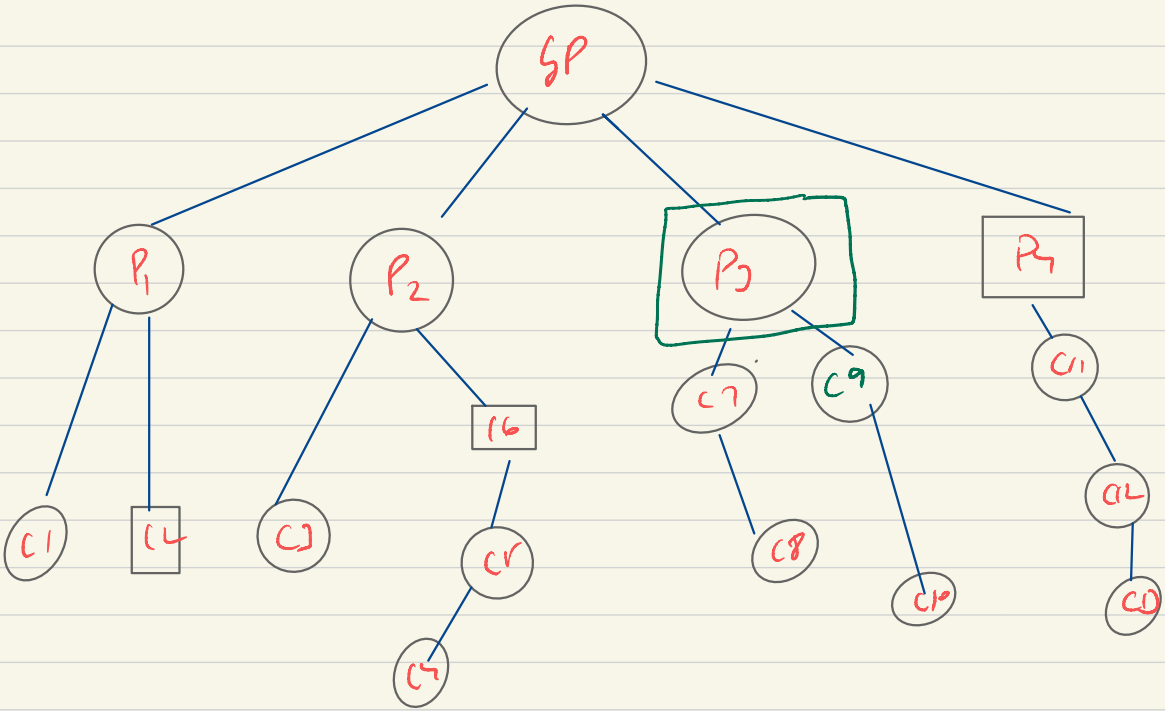
Internal of React



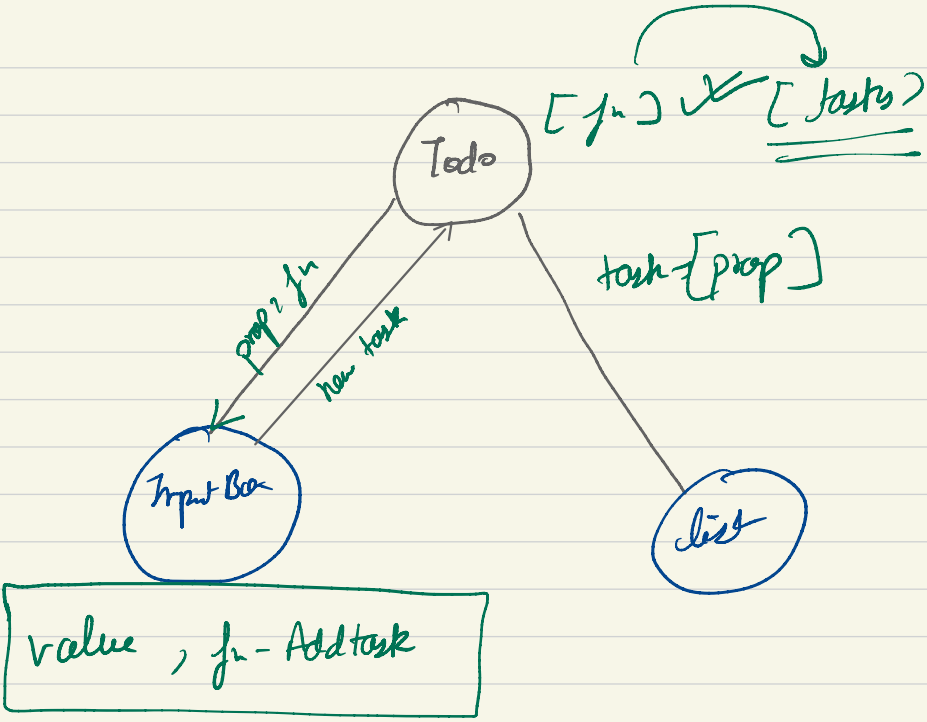
① Component → re-rendered

- → ✓ variable [hoisting]
- → State
- → ✓ function → handler

② What is controlled component ?



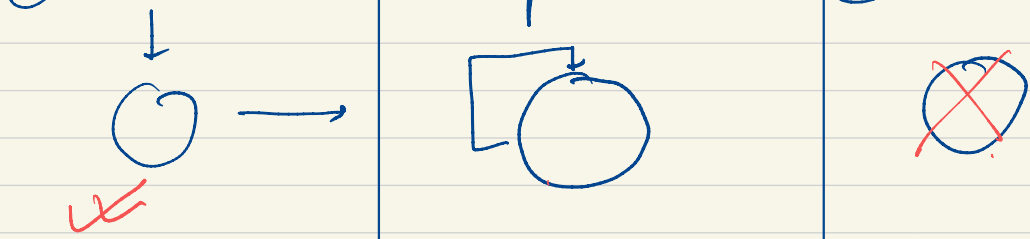
① Lifting the state up



Todo
[fn] [tasks]
task [prop]
prop, fn
new task
Input Box
list
value , fn - Addtask

Components

(mounting)	Updation	Unmounting
① Create	② Update	③ Deletion



→ usestate → a special var → for handling re-rendering of a component

→ useEffect
